

LONE WORKER PROTECTION

Lone Worker App

Prioritise employee safety with our worker safety app that offers 24/7 support, customisable alerts, and a direct line to emergency support through our award-winning ARC (Alarm Receiving Centre).

Lone Worker Protection

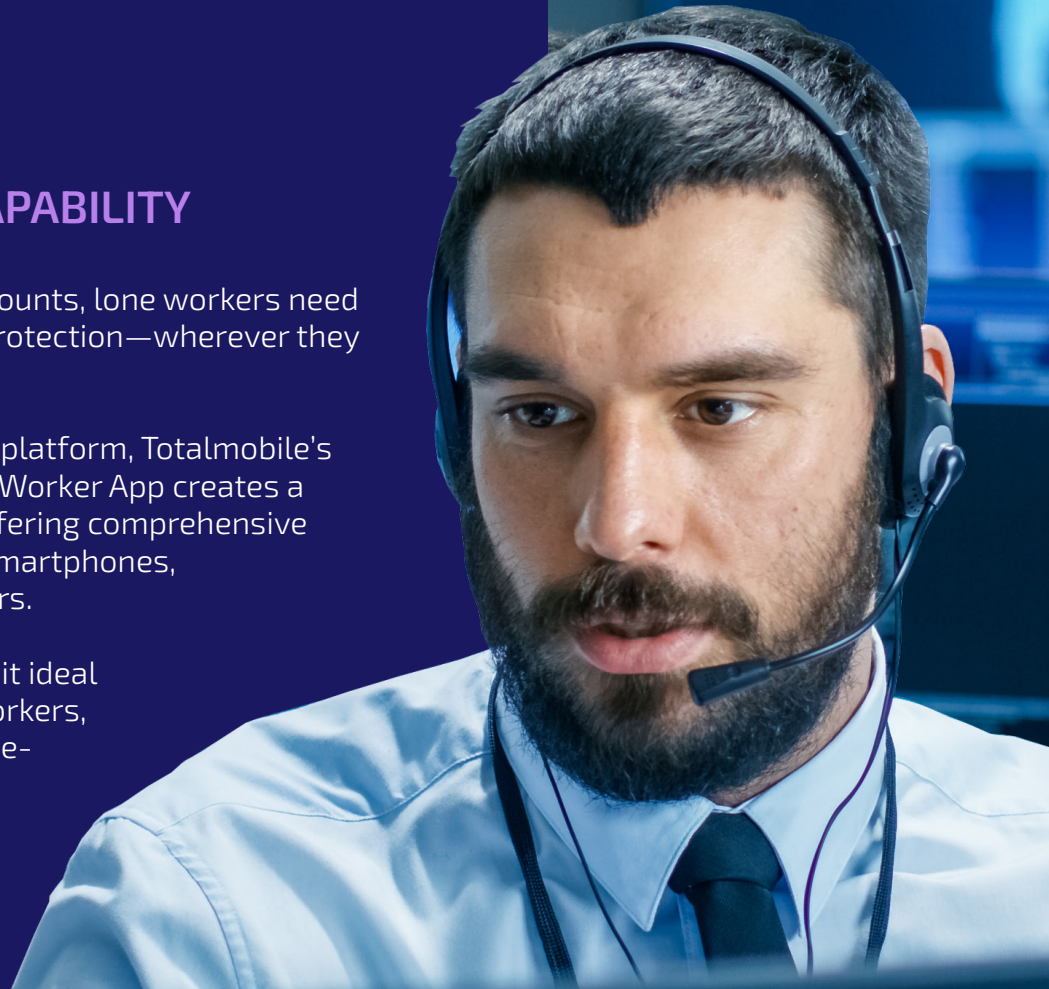

FIELD FIRST CAPABILITY

When every second counts, lone workers need immediate, reliable protection—wherever they are.

Part of the Field First platform, Totalmobile's award-winning Lone Worker App creates a reliable safety net, offering comprehensive coverage across all smartphones, tablets, and computers.

This flexibility makes it ideal for field staff, lone workers, remote workers, home-based staff and late-shift employee's.

Effortless Integration, Rapid Activation

Enhance Worker Safety

Continuous monitoring and rapid response ensure your remote workforce is supported around the clock, especially in high-risk situations.

Quick and Easy Deployment

With minimal user training required,, the app integrates effortlessly with regular device functions, ensuring availability when needed.

Emergency-Ready Access

Discreate activation bypasses phone screen locks (Android Only), connecting instantly to our 24/7 Alarm Receiving Centre (ARC).

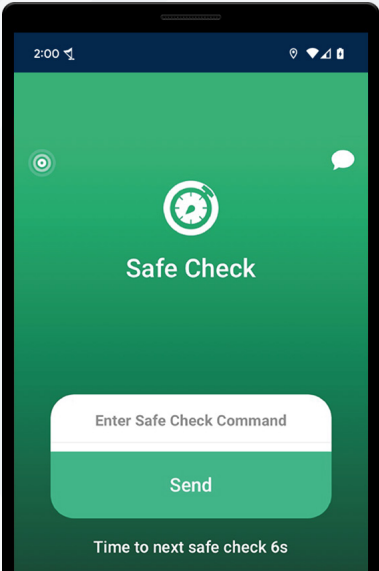

Strengthened Duty of Care

Reinforce your commitment to employee well-being by enabling your staff to work confidently and safely.

Gold Certified Safety

Certified to BS8484:2022 Gold standards, providing the highest level of protection.

Make Any Device A Lone Worker Alarm With Our Lone Worker App

Easily installed on most modern smartphones, our lone worker app is a complete safety toolkit accredited to the latest BS8484:2022 standards with SOS alarm activation, Red and Yellow Alerts, Timed Safe Check-ins, 24/7 ARC connectivity and Home Safe.

Easy to use, swiftly deployed

Easily installed on iOS and Android smartphones and smartwatches, you can quickly deploy our app across your workforce with minimal training or disruption.

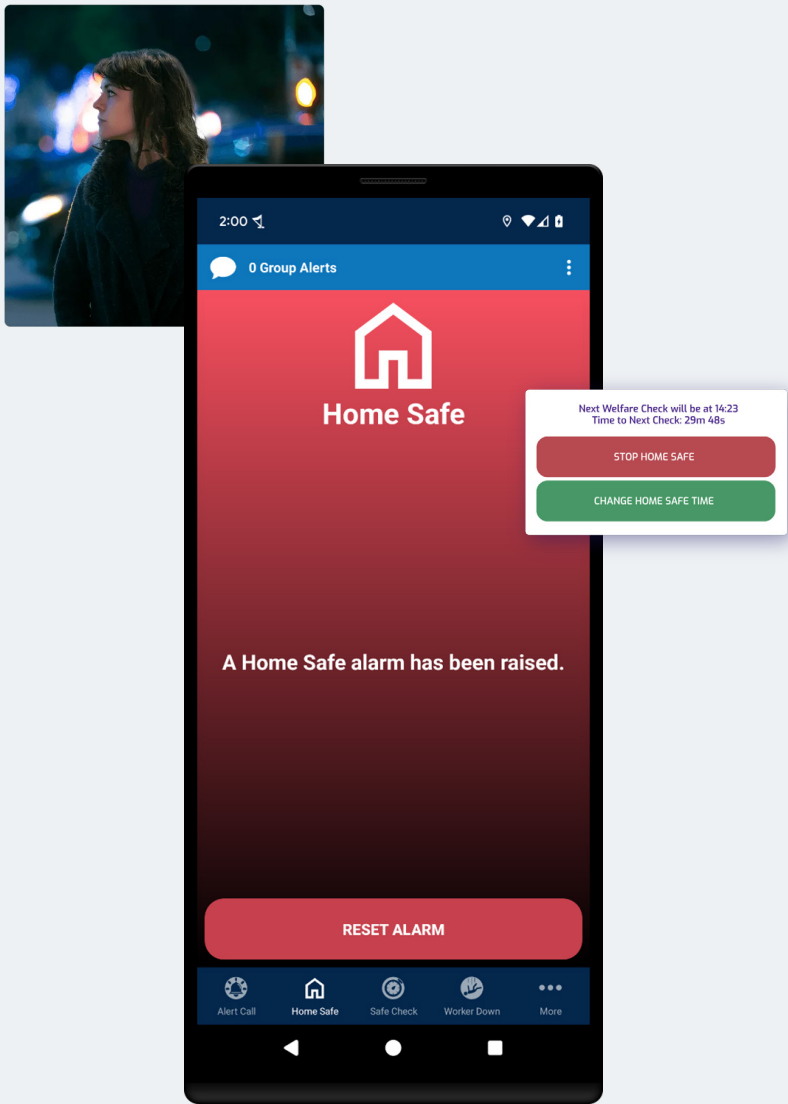

GPS & GPRS

GPS and GPRS technology delivers precise location data and rapid alert transmission during emergencies.

App Features

Red Alert

Workers who feel at risk can instantly raise a red alert, opening a direct two-way line with the Alarm Receiving Centre (ARC). Real-time GPS locating and direct emergency service escalation ensures a swift response, saving critical time thanks to our BS8484:2022 Gold Certification.

Home Safe

Ensures employee safety beyond traditional shifts through proactive welfare checks and automated shift-end confirmation. Instant SMS and email alerts immediately escalate missed check-ins to ensure round-the-clock protection.

Worker Down

Using sensors built in to the smartphone, our app can detect falls or a lack of movement over time. If no response or movement is received, the app automatically raises an alarm with the ARC without manual input from the worker, who may be unconscious or immobilised.

Yellow Alert

Allows workers to pre-record situational details before entering potentially hazardous environments. If a Red Alert follows or the worker is uncontactable, these recordings provide crucial contextual information.

Group Alert

Quickly broadcast critical safety information to specific groups, individuals, or geographic areas during emergencies, severe disruption, or extreme weather events.

Safe Check

Regular, automated welfare checks prompt workers to confirm their safety. If no response is received within a specified time frame, the system automatically escalates the situation to the ARC.

Safe Beacon

Provides alerts when workers approach or enter hazardous or monitored zones, proactively enhancing situational awareness and worker protection.

Benefits of The Lone Worker App

Prioritising lone worker safety is more than compliance—it creates a secure, confident, and high-performing workforce. Our Lone Worker App delivers tangible benefits:

Real-Time Recording

All activity is securely logged in real-time, accessible via a dedicated web portal, providing reliable evidence in case of incidents.

Discreet Alert Activation (Android only)

Workers can raise alerts instantly without unlocking the device screen, ensuring swift and discreet access to support.

Automatic Launch

The app activates automatically upon handset startup, reducing user intervention and guaranteeing constant protection.

Status Notifications

Workers receive proactive alerts if they enter signal-poor areas or if GPS is disabled, maintaining continuous safety coverage.

Integrated E-Learning

Built-in training resources support rapid onboarding and ongoing user competence.

Battery Optimisation

Minimal app battery usage ensures reliable performance throughout the workday without interruption.

Notting Hill Genesis

Notting Hill Genesis manages over 32,000 properties across London. They chose Totalmobile's Lone Worker Protection capability, deploying over 400 SOS Fobs and apps across smartphones, tablets, and computers used by their lone workers every single day.

emh homes

emh homes integrated Lone Worker Protection into the Totalmobile Job Management capability, enhancing safety for 100 lone workers serving 18,000 properties across 35 local authorities.

Now their teams have instant, one-click personal safety reporting integrated seamlessly into daily tasks.

[FOLLOW THE QR CODE TO LEARN MORE](#)

Before integrating capabilities, emh had **less than 100** safety compliance interactions per month

After incorporating Lone Worker Protection with Job Management, emh saw a rise to **over 16,000** interactions per month by the end of year one.

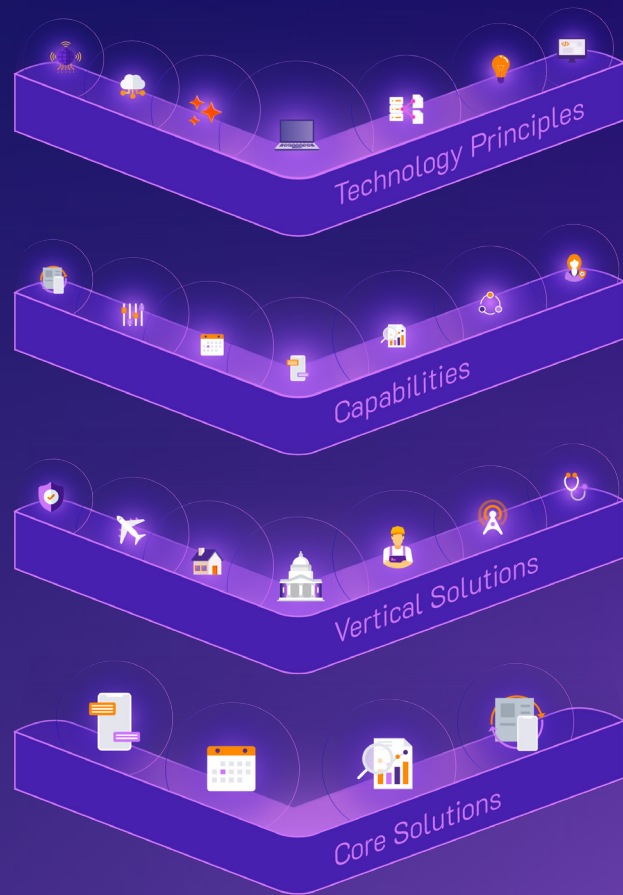

Emh now has a **90%** engagement with lone worker compliance

The integration aids emh in achieving **staff well-being** and **compliance** goals

The Field First Platform

Field First is Totalmobile's fully integrated and capability-rich FSM platform, enabling our customers to set new benchmarks for service excellence while making work, and the lives of field service workers, better.

Employee Safety that's Field First

Protecting employees creates a safer, more productive workforce. Fully integrated with Field First, our Lone Worker Protection capability boosts safety, compliance, and operational efficiency for:

Enhanced Employee Well-being
Increase visibility and support, ensuring workers feel secure, confident, and engaged, especially in high-risk roles.

Assured Compliance
Automated protocols, real-time tracking, and detailed reporting simplify compliance with BS8484 standards, positioning you as a responsible employer and reducing risk.

Controlled Costs
Fully managed service with predictable costs, eliminating unexpected expenses and ensuring continuous, cost-effective safety management.
