GRS

A UK Leading Police Resource Management Solution

DESIGNED SPECIFICALLY FOR POLICE SERVICES

A dedicated and comprehensive Resource Management solution for Police Services, that is not only designed to deal with unique and complex rostering challenges but, also has the ability to support the resourcing of both acute and planned Special Events based on availability, skill requirements and rank.

Introduction

POLICE SERVICES

GRS is a flexible, comprehensive Police Service Duty Management Solution, specifically designed to deal with the unique and complex Police rostering challenges. This functionally rich solution encompasses Time & Attendance, Annual Leave, Sickness, and other Absence types, as well as the assignment and management of Skill types, enabling organisation's to rapidly identify and deploy the appropriate resources to incidents including Special Events and Mutual Aid.

A Demanding Environment

Increases in demand, workforce shortages and a lack of funding are systemic challenges currently facing the Police Service, but that's not all. Police Service operations, including Support Staff, are facing many other challenges, including:

- > No clear, current and accurate picture of available resources (with current skills) that could be deployed in an emergency situation
- > Incorrect monthly payroll due to difficulty capturing actual time worked and claims for specific allowances
- > Difficulty offering and managing flexible working arrangements, including, agile working and individual roster patterns.
- > The planning/rostering team responding to numerous annual leave or shift swap requests
- > Staff not able to 'Self-Serve' via a mobile App or Web Portal
- > Double-keying information between the Resource Management System and other systems (HR, Payroll, Command & Control)
- > Regularly under resourcing (and occasionally over resourcing)

By deploying the correct technology, your Police Service can deal with complex scheduling needs whilst also helping to maximise the value of the available workforce.

Key Capabilities

The Key Capabilities of the GRS Resource Management Solution include:

1

Shift Planning, including management of all types of abstractions/absences (sickness, training etc).

2

Adapts to various types of complex shift patterns i.e. rotating, agile and flexible working.

3

Effortlessly identifies vacant shifts whilst providing an ability for staff to volunteer to cover them. (This process can be automated if required).

4

Easy to move an individual or team resources to a different part of the organisation structure for ad hoc shift coverage, set periods, or permanent transfer.

5

Accommodates the rostering of staff with multiple work contracts and/or multiple working locations.

6

Supports monitoring of the Working Time Regulations and other localised rules.

7

Effective resourcing of ad-hoc significant incidents as well as planned Special Events (Sporting Fixtures, Public Demonstrations).

8

Ability to rapidly identify and deploy appropriate resources in the event of a major incident, and send messages/notifications to resources.

9

A Mobile App and Self-Service Web Portal enabling Operational and Support Staff to access GRS on the go with access to the following functionality.

- > View past, current and future rosters
- > Request Time Off (Annual Leave, TOIL, Flexi, Leave etc.)
- > Record & Management of Sickness Absence
- > Application and authorisation of Shift Swaps (Can be automated subject to local rules)
- > View Time Balances (Annual Leave, TOIL, Flexi balance, Unsocial Hours, Overtime, Hours worked)
- > Respond to overtime opportunities, (Can be automated subject to local rules) and shift vacancies

10

A comprehensive electronic Time & Attendance/Timesheet module that supports adherence to the Police Regulations and Police Staff Handbook rules for the recording, claiming and authorisation of overtime and subsistence claims. The GRS Time Sheets can also support expenses claims for items such as missed meal breaks, short notice shift changes, and mileage allowances.

11

Comprehensive suite of reports.

12

Ability to automate annual leave and shift swap request approvals.

13

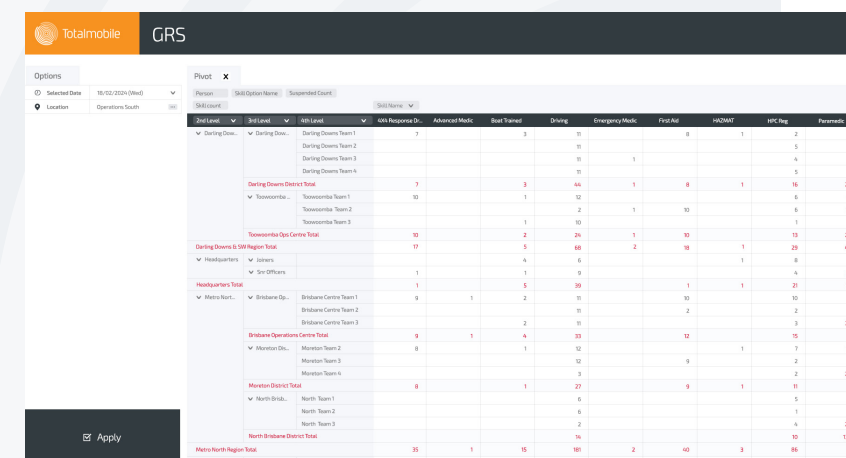

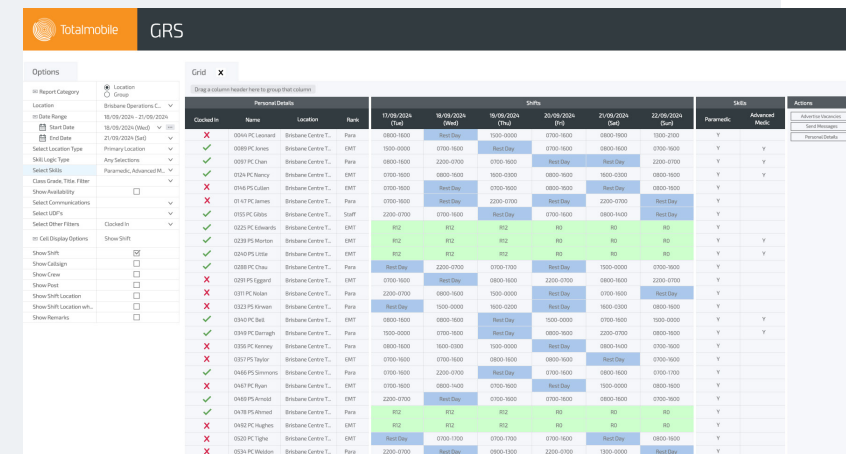

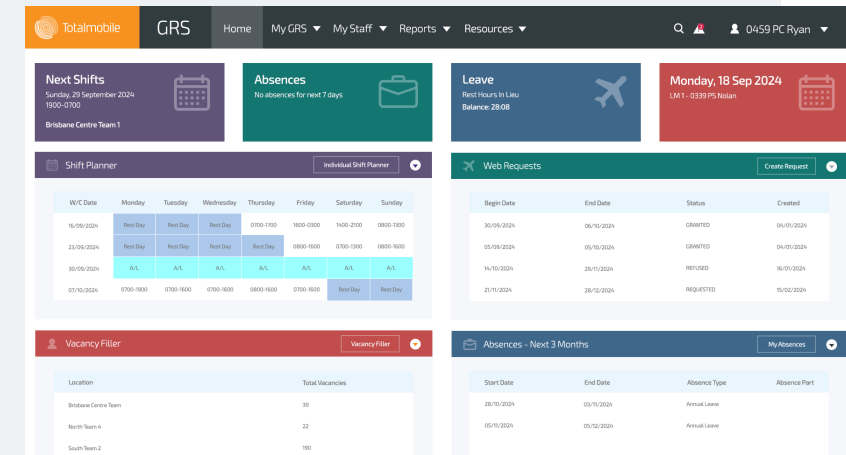

Fleet Resource alignment, ensuring vehicles are available for staff.

14

Supports central or devolved resourcing, or a mixture of both.

15

Proven ability to interface data with other core 3rd party operational systems, typically HR, Payroll and Command & Control.

Benefits

Maximize Efficiency & Effectiveness By:

- + Ability to Adapt swiftly to frequent changes is essential in managing the dynamic nature of a 24/7/365 Emergency Service.
- + Provision of both real-time and forecast views of resource levels, dynamically adjusting as staff become absent from, or return to duty.
- + Reduced overtime costs and superior management information by maintaining full control over your claim and approval process.
- + Compliance with your policies and standards by ensuring the right staff and skills are available and assigned to the appropriate shifts.
- + Rapid assessment of staff availability - by skill type, location, function, and hour of day.
- + Save time by automating simple, high volume administrative tasks, such as Annual Leave and Shift Swap requests.
- + Use the powerful Sickness module to effectively manage sickness absences.
- + Avoid double-keying data by sharing key information between operational systems with GRS's proven interface capabilities.

Improve Staff Satisfaction By:

- + Empower all staff to 'self-serve' by using the GRS mobile app and Self-Service web portal.
- + Ensure accurate payroll by using electronic timesheets that precisely capture actual time worked.

Shift Pattern Design

Alongside our key capabilities is our comprehensive shift pattern design service to support effective planning, management, and monitoring of shift work.

With support from our shift planning experts together with unique software tools, we will help you design and implement new shift working patterns that deliver increased flexibility and meet demand, whilst protecting employee well-being.

We recognise that changing shift patterns can be a challenging and emotive subject, but with the help of our engagement and communication experts, we will ensure your workforce and unions are fully involved with your new shift planning processes.

Key Functionality:

Import demand, define intervals and view demand vs. cover in a pattern

Create, manipulate and compare patterns to create a library of options (standby, special, relief etc.)

Forecast annual hours provided and configure automated alerts to assure compliance with minimum rest between shifts, maximum rolling weekly hours and other key measures
