

Smarter field operations that move mining teams from reactive maintenance to connected performance.

Totalmobile empowers mining and heavy asset organisations to digitise field operations, streamline maintenance execution, and connect frontline teams with real-time operational intelligence – within a single, unified platform.

Totalmobile's cloud-based Field First Platform and mobile capabilities connect mining maintenance teams with back-office functions, integrating core systems and enabling seamless, automated workflows that reduce manual effort, standardise processes, and ensure tasks are completed efficiently and consistently. Its mobile-first design empowers field workers to access schedules, capture accurate data, and complete jobs in real time, even in remote or challenging environments, while synchronising instantly with central systems. This drives near real-time visibility of operations, giving supervisors and decision-makers up-to-date insights into performance, asset status, and workforce activity. Together, intelligent workforce management, workflow automation, and connected mobile working help mining operators boost productivity, maximise asset uptime, strengthen compliance, and improve safety freeing teams to focus on what matters most.

With extensive experience in change management across highly complex organisations, Totalmobile works in partnership with your teams to configure a solution aligned to your mining maintenance operations, supporting delivery through a structured, phased implementation approach.

FROM PAPERWORK TO PERFORMANCE: END-TO-END DIGITAL WORK MANAGEMENT FOR MINING

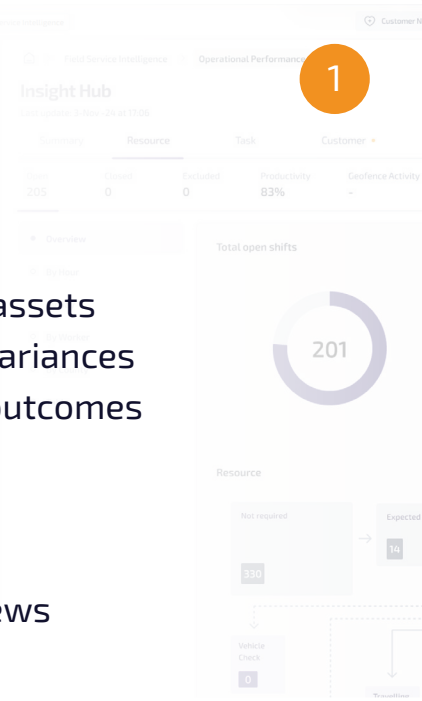

Field First

Built for Field Service. Designed for Excellence.

Real-time visibility into maintenance performance with Field Service Intelligence (FSI)

- Real-time view across jobs, workforce and assets
- Instant visibility of trends, exceptions and variances
- Monitor service performance and delivery outcomes
- Deep-dive into field-captured data
- Role-based, configurable dashboards
- Automated reporting and flexible exports
- Standard FSI analytics with configurable views

Mobile Working for Digital Field Execution

- Simple, intuitive interface built for frontline teams
- Access and update jobs, schedules and documents in real-time
- Full offline capability with intelligent sync on reconnection
- Capture forms, notes and field updates seamlessly
- Attach photos and updates directly to jobs
- Log time against tasks for accurate timesheets
- Manage materials and track inventory in the field
- Automatic sync across the platform and back-office
- Work offline anywhere & sync automatically on reconnection

Supervisor & Superintendent Management

- Full operational oversight for supervisors and superintendents
- Manage work orders by exception and priority
- Dynamically optimise and reassign work with intelligent scheduling
- Track job progress and workforce activity in near real-time
- Coordinate teams across shifts, sites and locations
- Reduce manual effort with streamlined digital workflows
- Enforce compliance across safety, audit and operational controls

Enterprise System Integration

- Connect field and office teams through a unified data layer
- Enhance existing systems with real-time field execution and feedback
- Secure, scalable data exchange across the enterprise
- Event-driven architecture for timely updates and automation
- Flexible integration aligned to operational and reporting needs

The Cost of Downtime

Every hour of unplanned downtime costs Australian mining operations thousands. Yet many teams are still managing work on paper, spreadsheets and disconnected systems.

More Operational Time – Less Manual Effort

Totalmobile's Field First Platform is designed to be intuitive, user-friendly and highly configurable, aligning with the way mining maintenance teams operate and reducing reliance on manual processes and disconnected tools.

SUPERVISORS/SUPERINTENDENTS

Gain a single operational view to allocate, manage and monitor work, team performance and compliance — reducing admin, sharpening decision-making and maintaining control across all activities.

FIELD-STAFF

Access complete job, asset and safety information through a mobile solution, enabling more efficient and safe execution of work in the field, with offline capability to support continuous productivity in remote environments.

PLANNERS

Easily configure and manage digital workflows, forms and job requirements to ensure work is planned, standardised and executed consistently, reducing rework and improving overall operational efficiency.

A Trusted Transformation Partner in Complex Operations.

Totalmobile acts as a true transformation partner, working closely and collaboratively with organisations to align the Field First Platform to their operational model and strategic objectives. This is delivered through an embedded delivery model. We work side-by-side with your teams, integrating into your processes and ways of working to ensure solutions are aligned, adopted, and delivered to drive meaningful operational improvement.

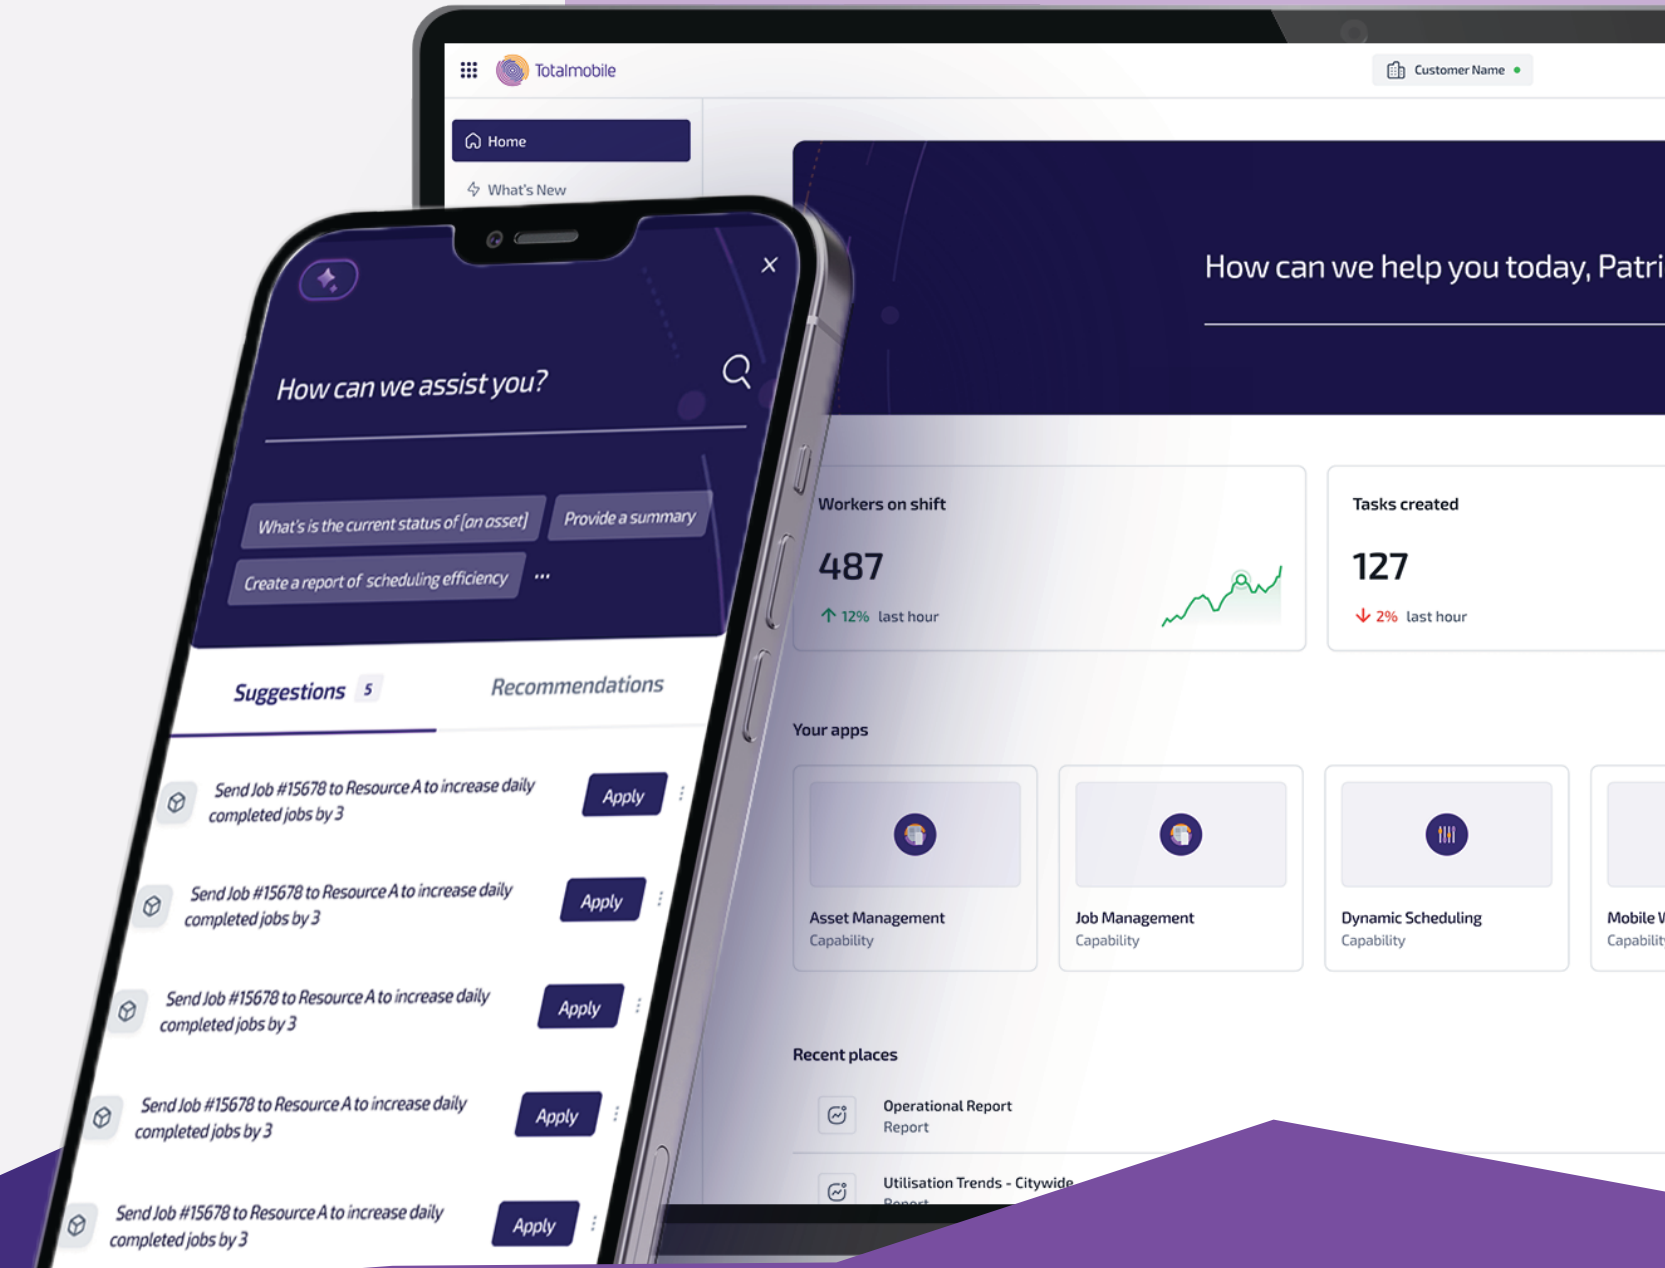

Our experienced consultants bring a proven track record in delivering large-scale transformation across highly complex environments, combining strong change management capabilities with a practical, delivery-led approach. By working closely with your teams throughout the journey, Totalmobile drives adoption, minimises disruption, and ensures the successful transition to new ways of working.

About Totalmobile

Transforming field service and maintenance through Totalmobile's Field First Platform.

An established market leader across the UK, Ireland, Australia and the Nordics, Totalmobile supports over 1,000 organisations and 500,000 workers to transform how field services are planned, delivered and managed delivering exceptional return on investment through reduced costs, increased capacity, stronger compliance, and better outcomes for both customers and teams.

Its Field First Platform is a powerful, highly configurable solution built for the complexity of large-scale maintenance operations across heavy asset industries including mining, utilities, telcos, public sector, healthcare and emergency services. By replacing fragmented, paper-based processes with a connected digital approach, Totalmobile gives mining operators real-time control over how work is planned, executed and managed; improving asset uptime, strengthening compliance, and freeing frontline teams to focus on what matters most.

Built for Field Service. Designed for Excellence.

Designed to adapt to mining maintenance and field operations, Totalmobile gives mining teams one connected platform to plan, execute and track work across every shift, site and asset; reducing reactive maintenance, closing the gap between field and office, and putting supervisors in control of what's happening right now.

Scan QR code for your online Demo Session

During your Demo Session, we will start by understanding your organisation's key priorities and operational challenges, followed by an overview of Totalmobile's field service and workforce management solutions to help you determine the right fit for your business.
